Day 23: Replicating Our Work

Raymond Yee

April 15, 2014 (`http://is.gd/wwod1423`)

Goals Today

- Learning to give and get feedback on our projects
- Learning a bit about the challenges of reproducibility

Questions for IPython folks

In Class Activity

See https://etherpad.mozilla.org/wwod1423

Projects will work in groups of 2 to review each other's starter notebooks. Your goals are:

- to understand the starter notebook of the other project
- to get the other project's notebook running on your laptop
- think about how that notebook can be improved
- document what anything you needed to do (such as installing dependencies or downloading data files) – preferably as a github issue on the other project's repository.
- bonus: if you have improvements that can be merged directly into the repository, clone the repo and issue a pull request.

Assignment due Thursday 2014.04.17
